

Inspired by the therapist - The integral lateral support was inspired from experiencing clinic after clinic. With the therapist using their hands to show where they wanted support. This support was designed into our backrests to replicate hands supporting the child.

It's what's inside that counts - Throughout the V-Trak range of backs all the adjustment is in the backrest.

Because Kids will be kids - Growth movement and durability. The pico range is designed for kids. The adjustability in the backrest allows for changes to be made easily for weight gain and growth.

Backrest Extension - BKXT-S

Can be inverted to provide thoracic or pelvic support

Accessories - Universal Harness carrier

VP-DC1 - Deep contour

VP-P1 - Profile Shallow contour

Technical Data

		Height (cm)	Outside Width (cm)	Inside / User Width (cm)	Contour Depth (cm)	Weight (kg)
VP-P1	V-Trak Paediatric profile backrest	24	30 > 33	23 > 26	5 > 7	0.8 kg
VP-DC1	V-Trak Paediatric Deep contour backrest	24	32 > 38	26 > 32	7 > 10	0.9 kg
BKXT-S	Backrest extension	10	18	N/A	N/A	0.17 kg

All measurements are an approximate as the foam will compress and should be used as a guide
